

We are looking for a Full-stack developer with focus on Data Engineering (m/f)

#whatwedo

Content Garden Technologies is a 2013 founded technology company with the vision to bring digital advertising to a new age. Native Advertising and Content Marketing is our playground where we are one of the major innovators in digital marketing. We are a young team working with great enthusiasm and dedication to change the digital world and our goal is to develop new advertising opportunities that people will enjoy consuming again.

#whatyoudo

- Develop web applications that provide in-depth insights to our data
- Help our team with the construction of data pipelines from tracking and gathering user data all the way up to the deployment of advanced Machine Learning models
- Ensure software development quality through development guidelines and architectural specifications
- Create and review code

#whatyouneed

- Several years (3+) of practical experience with the implementation of software solutions
- Background and extensive experience with server-side languages, Python is a must
- Proficiency with fundamental front-end languages such as HTML, CSS, JavaScript and TypeScript
- Database technologies such as MySQL, PostgreSQL and AWS RDS
- Practical experience with DevOps technologies such as CI/CD tools
- Machine Learning Services in AWS (e. g. SageMaker, EC2, S3)
- Knowledge of agile processes and principles as well as practical experience with agile development methods
- REST services in a microservice context (REST API, GraphQL)
- Containerized services and applications (Docker, Kubernetes is a plus)
- Basic math & Machine Learning skills (e.g, regression/ classification, deep learning, Bayes' law, linear algebra) and some knowledge of the necessary tools (e.g., TensorFlow/PyTorch, scikit-learn, pandas, numpy)
- Sound user knowledge of common project management tools such as Atlassian or GitLab
- Good verbal communication in German and/or English
- Good problem-solving skills and attention to detail
- Hands-on mentality and openness towards different cultures and backgrounds
- Additional skills considered as a plus: visualization tools (e. g., plotly/dash or bokeh), Big data (e. g., Spark, Hadoop, Dask), JavaScript frameworks (e. g. Vue.js, AngularJS and React), Flask Framework

#whatweoffer

- Teamwork and open discussion of technological developing projects
- Being part of a young and dynamic team
- Possibility of personal and professional development
- Amazing work atmosphere in a pleasant working environment
- In accordance with the collective agreement we offer the minimum salary between 3.100,00 and 3.700,00 euros gross per month (38,5h l week) for this position. We are willing to offer overpayment according to your qualifications and working experience.

#wannajoin
